

Basketball Stat Sheet

My-Team Sports

my-teamsports.com

Tally marks, twelve stats, one game per sheet — two keepers can split it (shooting / everything else)

US _____ THEM _____ DATE _____ FINAL _____

[illegible]

m/a = made / attempted (left of the line / right of the line) · OREB offensive rebound · DREB defensive rebound · AST assist · STL steal · BLK block · TO turnover · PF personal foul

PTS = $2 \times 2PT$ made + $3 \times 3PT$ made + FT made. Check: team PTS must equal the scoreboard. If it doesn't, the shooting columns are wrong, not the scoreboard.

One keeper? Track shooting (2PT, 3PT, FT) and turnovers only. A complete record of four stats beats a guess at twelve.

Add each game sheet into this one; the derived numbers at the right are the ones worth talking about

TEAM _____ SEASON _____ RECORD _____

[illegible]

THE THREE NUMBERS WORTH WORKING OUT

FG% = FGM ÷ FGA. Youth teams live between 30% and 40%. Under 30% is shot selection, not shooting — check the shot chart before you run a shooting drill.

PPG = PTS ÷ GP. Compare it with minutes, not with the other players: a 4-point kid playing 8 minutes may be your most efficient scorer.

AST ÷ TO (team). Above 1.0 means the ball is moving; below 0.7 means the offense is a dribble and a prayer. This number moves faster than any other once you work on it.

Keep it to the stats you actually recorded every game. A column with gaps is worse than no column.
